

ERRATA

Donazione (General)

- ◆ Donazione effect must always be executed whenever a plain tower is built. Even if you make a loss by 9[Trade] or 10[Conspiracy], you must play that effect. For a card of 5, you can choose not to play.

5 [Guard]

- ◆ You can play a card of 5 when your tower of 10 [Conspiracy] takes effect on one of your towers. You cannot cancel the effect of 9[Trade] you have triggered; only your opponent can do this.

10 [Conspiracy]

- ◆ When you have built a tower of 10, that tower does not undergo its own effect.
- ◆ When the highest towers are only of card 6 [Contract] or completed towers, the effect of [Conspiracy] goes onto the next highest towers, not cancelled.

Noble Cards (General)

- ◆ Not only by the actions of Purchase/Exchange, you can also draw Noble Cards by the action of Extension or Donazione: 8[Income]. Likewise, you can draw/pass Noble Cards by 9[Trade].

Noble Card [Buona Pietra]

- ◆ A tower can contain at most the half number

of its height of Buona Pietra (rounded down).

For example, if a tower is of 3 stories, you can use at most 1 card of Buona Pietra.

- ◆ If a tower containing one or more of Buona Pietra is destroyed, all cards including Buona Pietra are placed on the Tower Card deck, not on the Noble Card deck. When a plain tower is destroyed, its cards must be placed with its order unchanged, as you grab all the cards of the tower and put them directly on the deck.

Noble Card [Palazzo Comunale]

- ◆ "Opponents cannot build" means that the opponents cannot build/extend a higher tower.
- ◆ When its effect is cancelled by Giostra, you must retrieve 2 cards you have placed at the bottom of the deck into your hand.
- ◆ When you have played Palazzo Comunale and your opponent builds a tower of 10[Conspiracy] that destroys your highest tower, the height your opponent can build becomes lower. If you lose all the towers by [Conspiracy], your opponent cannot also build a new tower. (The card text *literally* takes effect.)
